Council for Land Care & Planning Inc.

October 20, 1990

EPA Administrator,
William R. Reilly,
Washington, D.C. 20460

Dear Administrator Reilly,

Our organization is overwhelmed to learn that the EPA's Agenda for Action: Prevention approach would give any consideration to the possibility of having the additive called "High Tec 3000" produced by the Ethyl Corporation of America added to gasoline.

Proof of any effects of this additive doing harm to humans or the environment may not be lacking, but a policy of Prevention could give guidance of nothing less to any agency than saying "no" to it.

Considering your agency demanded proven data that our appeal on the PSD permit for Spokane's mass burn garbage incinerator plan that the best available control technology is reduction and recycling and thus, our appeal was turned down, how can anything less be demanded of the Ethyl Corporation?

Please honor us with a reply.

Sincerely,

Ora Mae Orton, Spokesperson for CLCP
